Date: 19.09.2019

Petition to the European Parliament for violation of the rule of law - Article 2 TEU - by the Federal Republic of Germany

Ladies and Gentlemen of the German Bundestag,

On 16.08.2019 I submitted a petition to the Committee on Petitions of the European Parliament on behalf of 60 other petitioners from different countries of the European Union. The matter is of global importance. It concerns approximately 35,000 investor accounts, 50% of which are owned by the USA, 20% by Australia/New Zealand, 20% by Europe and 10% by other countries worldwide. All of them are victims of the Federal Government's obstructive behavior. It concerns a core asset of USD 300 billion plus interest and damages since 2007. If any of you are not yet aware of this, he or she is hereby given this information.

The committees that might be particularly interested:

- Committee on European Union Affairs
- Committee on Legal Affairs and Consumer Protection - Subcommittee on European Law
- Finance committee
- Budget committee
- Foreign Affairs Committee

The petition is headed:

“Germany inflicts considerable damage on the credibility of the European Union”

Subject: Petition for violation of the rule of law by the Federal Republic of Germany

The petition is based on Article 44 of the Charter of the European Union and Article 227 of the Treaty on European Union.

It is directed against the Federal Republic of Germany as a member of the European Union on the legal basis according to Article 2 TEU with the following accusations:

1. Influencing / obstructing the German judiciary
2. Influencing / obstructing the freedom of the press
3. Influencing / obstructing the execution of contractual agreements

The following information from a “whistleblower” involved with the EU Banking Authority informed us that the matter described in the petition has long been known to the EU Banking Authority, but has so far been kept under the carpet because of pressure from the German officials. Now voices have become loud that one no longer wants to accept this and the matter should be brought to the attention of those who have the authority to deal with it. Specifically the information received from the whistleblower stated:

"The Germans are not happy but satisfied with the current situation and want the current status quo to continue." This status quo includes:

- **To silence the media, including the German press.**
- **So that we don't get documents that we need.**

- **So that the criminal complaint in Germany does not come to the surface.**
- **To inform the EU and the banking authorities that this is a German matter and that they will keep out of it.**
- **So that the payment process can never be restarted.**

"This situation is not simple for the Germans, but it remains at present hidden. All the pressure seems to be coming directly from the Chancellery."

The petition corresponds to the rules and is in the obligatory admission phase.

The petition was brought to the attention of all 751 Members of the European Parliament as well as the European Banking Authority (EBA), the European Anti-Fraud Office (OLAF) and the European Group against Corruption (GRECO). A press release was sent to 1,406 international media, investigative journalists and international government agencies.

Furthermore, it is known from a reliable source that Germany (apparently again from the Chancellery) again tried to influence the Committee on Petitions to suppress the petition. In this respect the members of the Petitions Committee received a corresponding email.

It is hard to imagine that the Chancellor has no knowledge of all this activity.

Attached are the following documents (in the original in English and translated into German):

- Petition of 16.08.2019
- Letter to MEP's dated 22.08.2019 identical to EBA, OLAF and GRECO as well as press release
- Email to members of the Committee on Petitions of 02.09.2019

After reading these documents the following consideration could be interesting: Not so long ago the Federal Minister of Finance declared that there will be a 125 billion Euro shortfall in the next 5 years. Now he explains in the budget debate that many, many billions are available to be prepared for a possible economic crisis (recession). Where do these billions of euros suddenly come from?

It might also be interesting to further check where the billions of surpluses of the last six years actually came from?

A Global Humanitarian Fund, linked to the abovementioned entitlements of the account holders, exists for the benefit of all around the world. This program will be outside all existing programs and will be used to support education and health centers in impoverished and emerging communities. Everything is ready to go. Only the federal government's blockade prevents this for selfish reasons.

Ladies and Gentlemen of the German Bundestag,

be assured that we will not cease to carry this matter into the world until we receive justice. As our network reports, the petition was also on the sidelines of the last G7 summit at informal talks. The Chancellor is said not to have been amused. Petitions to parliaments of other countries are in preparation to show that the illegal behavior of the Federal Republic of Germany has so far prevented billions in tax revenues worldwide.

Parliament is the controlling body and the government is accountable. Politically, "Germany is facing a volcanic eruption a lá St. Helens with an earthquake of magnitude 8". One who knows this and is very concerned about his country is a respected personality and financial expert, formerly in a high state office, but gagged. As freely elected representatives, take responsibility in the interest of the Federal Republic of Germany to limit the damage already done. Watch carefully and do not allow yourself to be appeased or unwittingly involved.

Yours sincerely

Klaus Willer on behalf of the petitioners and all affected victims worldwide

PS: Since it cannot be ruled out that the federal states could be affected, the Prime Ministers and Presidents of the Senate will also receive this letter for information.
